PLASMA SEARCHLIGHT

TSUKUYOMI 9

(VR.2)

Beam Distance 900m

Pseudo-laser Beam

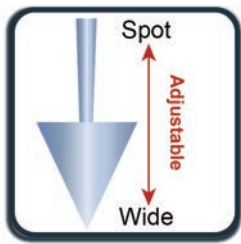

Weight 185g

"TSUKUYOMI-9 (VR. 2)" is not a conventional searchlight for illuminating the dark.
When suppressing the target, the lives of your team members are always at risk.
Protecting their lives has always been our mission.

Instantly deprive the target of visual contact and protect the lives of your team

◇ TSUKUYOMI-9 (VR. 2) Beam Characteristics

TSUKUYOMI-9 features pseudo-laser beam, which is not possible with LED and HID. There is no spread and vignetted light, only linear light. The strobe light of a specific frequency directly affects the brain through vision, which is essential for terror suppression. Unlike laser sources, which emit light at a point, this device emits light at a surface, eliminating the risk of blinding the target.

Plasma
TSUKUYOMI-9 (VR.2)

Laser

LED

HID

*Effective for targets wearing sunglasses.
Visibility-oriented light design allows beam to pass through in poor weather conditions.

◇ Beam at Work

Beam distance: 900m (US ANSI NEMA FL1 Standard)

*900m is the minimum guaranteed value. Actual beam distance is approximately 1,100m.

Spot Beam

Wide-Beam

Diffusion Lens Cover

◇ Non-Lethal Weapon

The linear source of the pseudo-laser beam affects the brain directly through the target's vision by means of a specific frequency strobe. It can instantly stop their action and take away their vision. The strobe is effective even in daylight. This is a product that neither LED nor HID could achieve. The strobe is set to a special frequency dedicated to the purpose of depriving the target of vision and action.

"Equipment to facilitate the prevention of crime and the suppression of potential criminals in the field."

◇ Ultra-Compact Searchlight

40mm

150mm

Weight 185g (excluding batteries)

◇ Main Specifications

- Beam distance 900m (US ANSI NEMA FL1 Standard)
- Waterproof IPX7 equivalent
- Drop resistance 1.5m
- Body length 150mm
- Body weight 185g (excluding batteries)
- Beam adjustment Spot ↔ Wide
- Lighting time Approx. 2 hours (with 21700 lithium battery)

◇ Operation

Lighting patterns, including the brightness adjustment, have been simplified to only three types: ON, OFF and Strobe. In response to many requests from professional users, the simple patterns have been adopted so that anyone can handle it under any circumstances without mishandling.

■ Normal

Toggle button: ON (indicator on) → OFF (off)

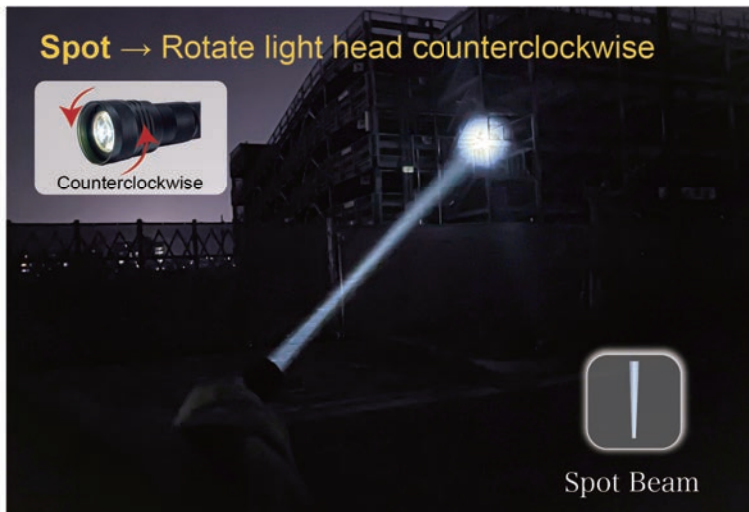

■ Strobe

Long-press 3 seconds: ON (flashing) → Toggle button (off)

Spot → Rotate light head counterclockwise

Counterclockwise

Spot Beam

Wide → Rotate light head clockwise

Clockwise

Wide Beam

TSUKUYOMI・9 (VR.2)

Perfect for

- Enemy Suppression
- Terror Suppression
- Riot Suppression
- VIP Protection
- Non-Lethal Weapon

CLASS 3B LASER PRODUCT

- ▶ Do not look into the beam
- ▶ Do not look directly at the beam

Specifications

Product name	TSUKUYOMI-9 (VR. 2)
Model type	RGT9-60STD-HP2
Max. luminous flux	369 (lm)
Light source	Plasma (pseudo-laser)
Beam distance	900m (US ANSI/NEMA FL1)
Lighting time	21700/2.2H 18650/1.5H

Strobe	15Hz
Body size	40 x 150 (mm)
Battery	21700 x 1 or 18650 x 1
Color temperature	6000K ± 500K
Body weight	185g (excl. batteries)
Beam adjustment	Spot ⇄ Wide

Body material	A6063 T6
Charging time	Approx. 5 hours
Lamp life	20,000 hours
Operating temperature	-10°C ~ +60°C
Waterproof	IPX7 equivalent
Drop resistance	1.5m
